

container< T >

```
graph BT; vector["vector< T >"] --> container["container< T >"]
```

The diagram illustrates a relationship between two C++ container types. At the bottom is a gray rectangular box labeled 'vector< T >'. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box labeled 'container< T >' at the top. This indicates that 'vector' is a specialization or inherits from 'container'.
